

E-TEAM GRANT PROGRAM

VentureWell is seeking student-led teams with science and engineering-based inventions that address the world's biggest problems.

Receive an E-Team grant and get training through our early-stage innovator training program. The program provides peer networking, expert coaching, national recognition, and hands-on workshops to move your innovation forward. Our offerings advance you through the pathway you're likely to take as an innovator and entrepreneur.

WORKSHOP DATES:

E1: Jan 10 - 12, 2019

E2: Jan 31 - Feb 2, 2019

LOCATION:

Boston, MA

DEADLINE:

October 3, 2018
at 11:59 PM ET

why apply?

Funding.

We offer \$5K and \$20K grants that are typically the first money in the door.

Training.

We trained thousands of entrepreneurs and innovators in our workshops and have an arsenal of case studies.

Networking & Mentorship.

Interact with fellow entrepreneurs, experienced startup trainers, and guest speakers and mentors.

National Exposure.

Workshops convene in Boston, a bustling startup hub, giving access to fellow entrepreneurs and our national network of mentors.

do you qualify?

- **Developed Invention.**
Do you have a science or technology invention with the intention to commercialize?
- **Social/Environmental Impact.**
Could your invention scale to address a social or environmental need? Some examples of types of technologies we fund include **medical or healthcare-related devices, clean energy technologies, and technologies for low-resource settings.**
- **Student Team Identified.**
Does your team include two or more students (grad/undergrad)?
Does your team have a faculty advisor?
- **Institution Member Status.**
Is your institution a VentureWell member? Membership is required by the time you submit your proposal.

testimonials

"Greatest realization was that we have to give much greater consideration to the market and potential customers and not just focus on the technology or clinical aspects of our innovation."

"The workshop was extremely effective in presenting methods to make analytical decisions about situations that are difficult to quantify or organize. This was represented in the competitor evaluations and market opportunity."
