

Freelance Science Writer

We are seeking an experienced science writer/journalist to produce a portfolio of stories that describe and spotlight the work and accomplishments of the National Science Foundation's Industry-University Cooperative Research Centers (IUCRC) Program. Written for a non-scientific audience, the stories will feature IUCRCs' most noteworthy breakthroughs or emerging advances, highlighting both research outcomes and human-interest outcomes.

Project Details:

- Write a story (up to 1000 words using AP style) about a breakthrough from each assigned center that engages a non-scientific audience in the work and accomplishments of that center.
- Meet deadlines when submitting drafts and managing feedback/edits.

Qualifications:

- Science writing/journalism experience. Experience writing for *Scientific American*, *Chemical & Engineering News*, or similar a plus.
- Strong storytelling capabilities, with a passion and aptitude for understanding and translating complex scientific concepts for a non-scientific audience.

Call for Proposals:

Your proposal should include:

- A resume/CV
- Writing portfolio
- Budget per story

Submit your proposal to Michael Sjostedt, Marketing & Communications Officer:

msjostedt@venturewell.org.
